

READ THE STORY OF GALILEO AND THEN SOLVE THE ACTIVITIES SUGGESTED BELOW.

Galileo is a young professor who studies science most of the time. One day, Galileo makes a discovery that could change the course of history forever. For hundreds of years, humans have believed that the planets revolved around the Earth. However, Galileo believes that the Sun is the center of the Solar System. When the head of the university, Pandora, hears Galileo's theory Galileo is forced to leave the country. Believing that Galileo is right, his assistant (Cosmos Green) follows him. Lyra, Cosmos' cousin, comes after them as well. The three of them embark on a journey of adventure and discovery.
